	Learning outcomes	Additional guidance
	Learners should be able to demonstrate and apply their knowledge and understanding of:	
(a)	potential divider circuit with components	Learners will also be expected to know about a potentiometer as a potential divider.
(b)	potential divider circuits with variable components e.g. LDR and thermistor	
(c)	(i) potential divider equations e.g. $V_{\mathrm{out}} = \frac{R_2}{R_1 + R_2} \times V_{\mathrm{in}}$ and $\frac{V_1}{V_2} = \frac{R_1}{R_2}$	*M2.3*
(c)	(ii) techniques and procedures used to investigate potential divider circuits which may include a sensor such as a thermistor or an LDR.	**PAG4** HSW6 Designing temperature and light sensing circuits.
