4.5.3 Wave–particle duality

	Learning outcomes	Additional guidance
	Learners should be able to demonstrate and apply their knowledge and understanding of:	
(a)	electron diffraction, including experimental evidence of this effect	Learners should understand that electron diffraction provides evidence for wave-like behaviour of particles.
(b)	diffraction of electrons travelling through a thin slice of polycrystalline graphite by the atoms of graphite and the spacing between the atoms	
(c)	the de Broglie equation $\lambda = \frac{h}{p}$.
