Topic 33: Electricity – Magnetism and electromagnetism

Students should:		Guidance *iLowerSecondary Curriculum reference*
33.1	know that a bar magnet has a north(-seeking) pole and a south(-seeking) pole	*Year 8: Forces – Magnetism*
33.2	know that a compass is a magnet that points north	*Year 8: Forces – Magnetism*
33.3	know that like poles repel each other and opposite poles attract each other	*Year 8: Forces – Magnetism*
33.4	know that the magnetic field is the space around a magnet in which the magnetic force has an effect	*Year 8: Forces – Magnetism*
33.5	know how to find the shape of the magnetic field around a magnet	*Year 8: Forces – Magnetism*
33.6	know about the Earth's magnetic field and how compasses are affected by it	*Year 8: Forces – Magnetism*
33.7	know that a wire with an electric current flowing through it creates a magnetic field around it	*Year 9: Electricity – Electromagnets*
33.8	know that when the wire is wrapped into a coil the magnetic field produced is similar to that of a bar magnet	*Year 9: Electricity – Electromagnets*
33.9	know how the strength of the magnetic field of an electromagnet can be changed	limited to the number of turns of the coil, insertion of soft iron core and the size of the current *Year 9: Electricity – Electromagnets*
