4. Exponentials and logarithms

What students need to learn:

$y = a^x$ and its graph.

Laws of logarithms.	To include $\log_a xy \equiv \log_a x + \log_a y$, $\log_a \frac{x}{y} \equiv \log_a x - \log_a y$, $\log_a x^k \equiv k \log_a x$, $\log_a \frac{1}{x} \equiv -\log_a x$, $\log_a a = 1$
The solution of equations of the form $a^x = b$.	Students may use the change of base formula.
