6.04	Algebraic inequalities				
6.04a	Inequalities in one variable	Understand and use the symbols $<$, $\leqslant$, $>$ and $\geqslant$	Solve linear inequalities in one variable, expressing solutions on a number line using the conventional notation. e.g $2x + 1 \geqslant 7$  $1 < 3x - 5 \leqslant 10$  	Solve quadratic inequalities in one variable. e.g. $x^2 - 2x < 3$ Express solutions in set notation. e.g. $\{x : x \geqslant 3\}$ $\{x : 2 < x \leqslant 5\}$ *[see also Polynomial and reciprocal functions, 7.01c]*	N1, A3, A22
6.04b	Inequalities in two variables			Solve (several) linear inequalities in two variables, representing the solution set on a graph. *[see also Straight line graphs, 7.02a]*	A22

GCSE (9–1) content Ref.	Subject content	Initial learning for this qualification will enable learners to…	Foundation tier learners should also be able to…	Higher tier learners should additionally be able to…	DfE Ref.
