5.04 Linear Combinations of Random Variables			
5.04a	Linear combinations of any random variables		a) Be able to use the following results, inclu where $a = b = \pm 1$ and/or $c = 0$: 1. $\mathrm{E}(aX + bY + c) = a\mathrm{E}(X) + b\mathrm{E}(Y) +$ 2. if X and Y are independent then $\mathrm{Var}(aX + bY + c) = a^2\,\mathrm{Var}(X) + b^2$
5.04b	Linear combinations of normal random variables		b) Be able to use the following results: 1. if X has a normal distribution then normal distribution, 2. if X and Y have independent norma then $aX + bY$ has a normal distribu
