

3.6.3 Types of program translator

3.6.3.1 Types of program translator

Content	Additional information
Understand the role of each of the following: • assembler • compiler • interpreter. Explain the differences between compilation and interpretation. Describe situations in which each would be appropriate.	
Explain why an intermediate language such as bytecode is produced as the final output by some compilers and how it is subsequently used.	
Understand the difference between source and object (executable) code.
