

## 3.9 H: Integration

|    | Content                                           |
|----|---------------------------------------------------|
| H1 | Know and use the Fundamental Theorem of Calculus. |

  

|    | Content                                                                                      |
|----|----------------------------------------------------------------------------------------------|
| H2 | Integrate $x^n$ (excluding $n = -1$ ), and related sums, differences and constant multiples. |
