

## 3.10 J: Vectors

|    | Content                        |
|----|--------------------------------|
| J1 | Use vectors in two dimensions. |

|    | Content                                                                                                            |
|----|--------------------------------------------------------------------------------------------------------------------|
| J2 | Calculate the magnitude and direction of a vector and convert between component form and magnitude/direction form. |

|    | Content                                                                                                                                                               |
|----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| J3 | Add vectors diagrammatically and perform the algebraic operations of vector addition and multiplication by scalars, and understand their geometrical interpretations. |

|    | Content                                                                                                         |
|----|-----------------------------------------------------------------------------------------------------------------|
| J4 | Understand and use position vectors; calculate the distance between two points represented by position vectors. |

|    | Content                                                                             |
|----|-------------------------------------------------------------------------------------|
| J5 | Use vectors to solve problems in pure mathematics and in context, including forces. |
