
3.3.2 Implementing involves the ability to work methodically and safely, demonstrating competence in the required manipulative skills and efficiency in managing time. Raw data should be methodically collected and recorded during the course of the investigation.

Candidates should be able to

- show full regard for safety and the ethical issues involved with the well-being of living organisms and the environment
- carry out an investigation in a methodical and organised way, demonstrating competence in the required manipulative skills and efficiency in managing time
- take all measurements to an appropriate level of accuracy and precision
- collect and present raw data in a suitable table conforming to the conventions specified in the Institute of Biology publication, *Biological Nomenclature, Recommendations on Terms, Units and Symbols*, 3rd edition (2000) concerning organisation and presentation of units.

Practical work carried out in the context of Units 1 and 2 should enable candidates to gain experience of

- using an optical microscope, preparing temporary mounts, staining and estimating size
- collection of reliable quantitative data where
 - gas is evolved
 - colour change takes place
 - there are changes in mass or length.
