
3.6.4 Limitations are inherent in the material and apparatus used and procedures adopted. These limitations should be identified, evaluated and methods of overcoming them suggested.

Candidates should be able to

- identify the limitations inherent in the apparatus and techniques used
 - discuss and assess the relative effects of these limitations on the reliability and precision of the data and on the conclusions that may be drawn, resolving conflicting evidence
 - suggest realistic ways in which the effect of these limitations may be reduced
 - suggest further investigations which would provide additional evidence for the conclusions drawn.
-
