

3.2.4	Redox Reactions	
	<i>Oxidation and reduction</i>	know that oxidation is the process of electron loss
		know that oxidising agents are electron acceptors
		know that reduction is the process of electron gain
	<i>Oxidation states</i>	know that reducing agents are electron donors
		know and be able to apply the rules for assigning oxidation states in order to work out the oxidation state of an element in a compound from its formula
		understand oxidation and reduction reactions of s and p block elements
	<i>Redox equations</i>	be able to write half-equations identifying the oxidation and reduction processes in redox reactions when the reactants and products are specified
		be able to combine half-equations to give an overall redox equation
