

3.4.8	Amino Acids	
	<i>Acid and base properties</i>	understand that amino acids have both acidic and basic properties, including the formation of zwitterions
	<i>Proteins</i>	understand that proteins are sequences of amino acids joined by peptide links
		understand that hydrolysis of the peptide link produces the constituent amino acids
		know that mixtures of amino acids can be separated by chromatography
		understand the importance of hydrogen bonding in proteins (detailed structures not required)
