

4.2.7 Dictionaries

4.2.7.1 Dictionaries

Content	Additional information
Be familiar with the concept of a dictionary.	A collection of key-value pairs in which the value is accessed via the associated key.
Be familiar with simple applications of dictionaries, for example information retrieval, and have experience of using a dictionary data structure in a programming language.	Information retrieval: For example, the document 'The green, green grass grows' would be represented by the dictionary: <code>{'grass' : 1, 'green' : 2, 'grows' : 1, 'the' : 1}</code> ignoring letter case.
