

4.3.3 Reverse Polish

4.3.3.1 Reverse Polish – infix transformations

Content	Additional information
Be able to convert simple expressions in infix form to Reverse Polish notation (RPN) form and vice versa. Be aware of why and where it is used.	Eliminates need for brackets in sub-expressions. Expressions in a form suitable for evaluation using a stack. Used in interpreters based on a stack for example Postscript and bytecode.
