

4.3.4 Searching algorithms

4.3.4.1 Linear search

Content	Additional information
Know and be able to trace and analyse the complexity of the linear search algorithm.	Time complexity is $O(n)$.

4.3.4.2 Binary search

Content	Additional information
Know and be able to trace and analyse the time complexity of the binary search algorithm.	Time complexity is $O(\log n)$.

4.3.4.3 Binary tree search

Content	Additional information
Be able to trace and analyse the time complexity of the binary tree search algorithm.	Time complexity is $O(\log n)$.
