

3.3.5 ME: Centres of mass and moments

	Content
ME1	Centre of mass for a system of particles.

	Content
ME2	Centre of mass for a composite body.

	Content
ME4	Centres of mass of bodies formed by rotating a region about the x -axis.
	Content
ME5	Conditions for sliding and toppling. Problems including suspension and on an inclined plane.
	Content
ME6	Determine the forces acting on a rigid body in equilibrium. Use of moments and couples.
