

3.4.3 SC: Type I and Type II errors

	Content
SC1	Understand Type I and Type II errors and define in context. Calculate the probability of making a Type I error from tests based on a Poisson or Binomial distribution. Calculate probability of making Type I error from tests based on a normal distribution.

	Content
SC2	Understand the power of a test. Calculations of $P(\text{Type II error})$ and power for a test for tests based on a normal, Binomial or a Poisson distribution.
