

3.4.5 SE: Chi squared tests for association

	Content
SE1	Construction of $n \times m$ contingency tables.

	Content
SE2	Use of $\sum \frac{(O_i - E_i)^2}{E_i}$ as an approximate χ^2 statistic with appropriate degrees of freedom.

	Content
SE3	Know and use the convention that all E_i should be greater than 5.

	Content
SE4	Identification of sources of association in the context of a question.

	Content
SE5	Knowledge of when and how to apply Yates' correction.
