

3.4.2 Specific skills

The following sections identify specific qualitative and quantitative skills to be developed.

3.4.2.1 Core skills

- Use and annotation of illustrative and visual material: base maps, sketch maps, OS maps (at a variety of scales), diagrams, graphs, field sketches, photographs, geospatial, geo-located and digital imagery.
- Use of overlays, both physical and electronic.
- Literacy – use of factual text and discursive/creative material and coding techniques when analysing text.
- Numeracy – use of number, measure and measurement.
- Questionnaire and interview techniques.

3.4.2.2 Cartographic skills

- Atlas maps.
- Weather maps – including synoptic charts (if applicable).
- Maps with located proportional symbols.
- Maps showing movement – flow lines, desire lines and trip lines.
- Maps showing spatial patterns – choropleth, isoline and dot maps.

3.4.2.3 Graphical skills

- Line graphs – simple, comparative, compound and divergent.
- Bar graphs – simple, comparative, compound and divergent.
- Scatter graphs, and the use of best fit line.
- Pie charts and proportional divided circles.
- Triangular graphs.
- Graphs with logarithmic scales.
- Dispersion diagrams.

3.4.2.4 Statistical skills

- Measures of central tendency – mean, mode, median.
- Measures of dispersion – range, inter-quartile range and standard deviation.
- Inferential and relational statistical techniques to include Spearman's rank correlation and Chi-square test and the application of significance tests.

3.4.2.5 ICT skills

- Use of remotely sensed data (as described above in Core skills).
- Use of electronic databases.
- Use of innovative sources of data such as crowd sourcing and 'big data'.
- Use of ICT to generate evidence of many of the skills provided above such as producing maps, graphs and statistical calculations.
