

3.14 M: Probability

	Content
M1	Understand and use mutually exclusive and independent events when calculating probabilities. Link to discrete and continuous distributions.
	Content
M2	Understand and use conditional probability, including the use of tree diagrams, Venn diagrams, two-way tables. Understand and use the conditional probability formula. $P(A B) = \frac{P(A \cap B)}{P(B)}$
	Content
M3	Modelling with probability, including critiquing assumptions made and the likely effect of more realistic assumptions.
