

3.8.6 Use of non-original material

With the exception of musical performances, students should not use any non-original material in their media products. All images, footage and text is to be created by the student. If a student does use any non-original images, footage or text, they should be aware that their marks will be limited by the marking criteria (see [Guidance on applying the marking criteria](#) (page 20)). They must acknowledge any non-original material on the Candidate Record Form.

Students do not have to write and record their own musical performances, either to use as part of a soundtrack or in a music video. Musical tracks that they use should be acknowledged on the Candidate Record Form.
