

3.8.7 Websites and video games

For briefs where website or video game creation is required, students do not need to be able to code. Students can use website design apps, online templates and game design software. Students are responsible for the design of the website or game and the content (such as language, images, audio-visual material) must be created by the student. Students must acknowledge any software or templates which have been used on the appropriate Candidate Record Form.
