

4.2.3 Health

Students are expected to be familiar with sociological explanations of the following content:

- the social construction of health, illness, disability and the body, and models of health and illness
- the unequal social distribution of health chances in the United Kingdom by social class, gender, ethnicity and region
- inequalities in the provision of, and access to, health care in contemporary society
- the nature and social distribution of mental illness
- the role of medicine, the health professions and the globalised health industry.
