

4.3.2 Theory and Methods

Students must examine the following areas:

- quantitative and qualitative methods of research; research design
- sources of data, including questionnaires, interviews, participant and non-participant observation, experiments, documents and official statistics
- the distinction between primary and secondary data, and between quantitative and qualitative data
- the relationship between positivism, interpretivism and sociological methods; the nature of 'social facts'

- the theoretical, practical and ethical considerations influencing choice of topic, choice of method(s) and the conduct of research
- consensus, conflict, structural and social action theories
- the concepts of modernity and post-modernity in relation to sociological theory
- the nature of science and the extent to which Sociology can be regarded as scientific
- the relationship between theory and methods
- debates about subjectivity, objectivity and value freedom
- the relationship between Sociology and social policy.
