

3.2.2 Ethical and environmental considerations

Content	Additional information
Ethical considerations	Students should be able to identify and analyse where there may be a possible trade off between ethics and profit. Ethical behaviour requires businesses to act in ways that stakeholders consider to be both fair and honest. Students are expected to know relevant examples of ways in which a business can behave ethically and the benefits and drawbacks of ethical behaviour.
Environmental considerations: • impact on traffic congestion • recycling • disposing of waste • noise and air pollution.	Students should be able to demonstrate knowledge and understanding of how business and consumers accept greater environmental responsibility in their decision making and the costs and benefits of businesses behaving this way.
Sustainability: • global warming • using scarce resources.	Students should be able to identify and analyse where there may be a possible trade-off between sustainability and profit.
