

3.1.4 Systems approach to designing

Students should consider electronic systems including programmable components to provide functionality to products and processes, and enhance and customise their operation.

Inputs

Content	Potential links to maths and science
The use of light sensors, temperature sensors, pressure sensors and switches.	Extracting information from technical specifications. Component names, interaction and operation.

Processes

Content	Potential links to maths and science
The use of programming microcontrollers as counters, timers and for decision making, to provide functionality to products and processes.	Extracting information from technical specifications. Component names, interaction and operation.

Outputs

Content	Potential links to maths and science
The use of buzzers, speakers and lamps, to provide functionality to products and processes.	Extracting information from technical specifications. Component names, interaction and operation.
