

3.3.1 Investigation, primary and secondary data

Use primary and secondary data to understand client and/or user needs

Content	Potential links to maths and science
How the following techniques are used and applied: • market research, interviews and human factors including ergonomics • focus groups and product analysis and evaluation • the use of anthropometric data and percentiles.	Analysing responses to user questionnaires. Frequency tables and information on design decisions. Presentation of client survey responses. Percentiles ranges used in anthropometrics and/or ergonomics.

How to write a design brief and produce a design and manufacturing specification

Content	Potential links to maths and science
Students should consider their own needs, wants and interests and those of others.	

Carry out investigations in order to identify problems and needs

Content	Potential links to maths and science
Why a designer considers alterations to a brief and modifying the brief as required.	Comparative chart of performance criteria as for existing products to help evaluate them.
