

3.2.1 Macronutrients

3.2.1.1 Protein

Content	Students must know and understand	Suggested application and food preparation skills
• low and high biological value proteins • protein complementation • protein alternatives eg textured vegetable protein (TVP), soya, mycoprotein and tofu.	• the functions • main sources • effects of deficiency and excess • related dietary reference values.	• Modify recipes for vegetarian diets. • Knife skills – meat, fish or their alternatives (S2). • How acids denature and coagulate protein (S9). • Make a bolognese sauce using meat or a meat alternative such as soya (S8).

3.2.1.2 Fats

Content	Students must know and understand	Suggested application and food preparation skills
• saturated fats • unsaturated fats (monounsaturated and polyunsaturated).	• the functions • main sources • effects of deficiency and excess • related dietary reference values.	• Make a pastry, shape and finish a pastry (S10). • Use food processor to make pastry (S5). • Adapt methods of cooking to reduce fat, eg grilling instead of frying, baking instead of roasting (S4). • Modify a recipe to reduce total fat.

3.2.1.3 Carbohydrates

Content	Students must know and understand	Suggested application and food preparation skills
• starch (polysaccharides) • sugars (monosaccharides/disaccharides) • dietary fibre.	• the functions • main sources • effects of deficiency and excess • related dietary reference values.	• Use starch to set a mixture (S12). • Demonstrate proving to make bread rolls using high fibre flour (S10). • Modify a recipe to increase fibre.
