

3.2.3 Nutritional needs and health

3.2.3.1 Making informed choices for a varied and balanced diet

Content	Students must know and understand	Suggested application and food preparation skills
- the current guidelines for a healthy diet. - portion size and costing when meal planning. - how peoples' nutritional needs change and how to plan a balanced diet for different life stages. - how to plan a balanced meal for specific dietary groups. - how to maintain a healthy body weight throughout life.	- the current guidelines for a healthy diet eg eatwell plate. - nutritional needs for the following life stages: young children, teenagers, adults and the elderly. - how to plan a balanced meal for specific dietary groups: vegetarian and vegan, coeliac, lactose intolerant and high fibre diets.	- Consideration of the nutritional needs and food choices when selecting recipes, including when making decisions about the ingredients, processes, cooking methods and portion sizes. - To plan, prepare, cook, modify, and create recipes to meet different dietary groups and life stages.

3.2.3.2 Energy needs

Content	Students must know and understand	Suggested application and food preparation skills
- the basal metabolic rate (BMR) and physical activity level (PAL) and their importance in determining energy requirements. - the recommended percentage of energy intake provided by protein, fat and carbohydrates (starch and sugar).	- factors which affect the BMR, such as age, gender and PAL. Their importance in achieving energy balance. - the percentage of recommended energy sources from nutrients: - protein 15% - fat 35% or less - carbohydrate 50% (of which 45% from starches, lactose in milk and fruit sugars and a maximum of 5% from free sugars).	- general practical skills (S1). - demonstrate portion sizes according to life stage/PAL level.

3.2.3.3 How to carry out nutritional analysis

Content	Students must know and understand	Suggested application and food preparation skills
how to plan and modify recipes, meals and diets to reflect the nutritional guidelines for a healthy diet.	how to use current nutritional information and data eg food tables, nutritional analysis software to calculate energy and nutritional value.	Plan, make and modify dishes calculating energy and nutritional values.

3.2.3.4 Diet, nutrition and health

Content	Students must know and understand	Suggested application and food preparation skills
- the relationship between diet, nutrition and health - the major diet related health risks.	how diet can affect health and how nutritional needs change in relation to: - obesity - cardiovascular health (coronary heart disease (CHD) and high blood pressure) - bone health (rickets and osteoporosis) - dental health - iron deficiency anaemia - Type 2 diabetes.	Select and adjust cooking process to match the recipe and take account of dietary group eg grill meat rather than fry to reduce the fat content as a high saturated fat intake is a risk factor for CHD (S1).
