Note, if derived forms are included in listening material or required for production, they are listed separately in the vocabulary list.

French sound-symbol correspondences

This list specifies key differences in sound-spelling correspondences between French and English which students will need to learn at GCSE to be able to read out loud and transcribe with sufficient accuracy at this level. It is not an exhaustive list of all the sound-spelling correspondences in the French language. Where a letter or combination of letters is pronounced (or a sound spelt) in approximately the same way in French as in English, it is not listed.

Students will be expected to pronounce words with stress patterns that allow their speech to be clear and comprehensible.

The use of hyphens indicates the position of the letters in a word, when position is relevant to the sound. Eg: xx- (at the beginning of a word), -xx- (in the middle of a word), -xx (at the end of a word).
