

3.2.4 Sequences

A23

Basic foundation content	Additional foundation content	Higher content only
generate terms of a sequence from either a term-to-term or a position-to-term rule		

Notes: including from patterns and diagrams.

A24

Basic foundation content	Additional foundation content	Higher content only
recognise and use sequences of triangular, square and cube numbers and simple arithmetic progressions	including Fibonacci-type sequences, quadratic sequences, and simple geometric progressions (r^n where n is an integer and r is a rational number > 0)	including other sequences including where r is a surd

Notes: other recursive sequences will be defined in the question.

A25

Basic foundation content	Additional foundation content	Higher content only
deduce expressions to calculate the n th term of linear sequences		including quadratic sequences
