

3.2.2 Language, thought and communication

Content	Additional information
The possible relationship between language and thought The effect of language and thought on our view of the world	Piaget's theory: language depends on thought. The Sapir-Whorf hypothesis: thinking depends on language. Variation in recall of events and recognition of colours, eg in Native American cultures.
Differences between human and animal communication	Limited functions of animal communication (survival, reproduction, territory, food). Von Frisch's bee study. Properties of human communication not present in animal communication, eg plan ahead and discuss future events.

Content	Additional information
Non-verbal communication	Definitions of non-verbal communication and verbal communication. Functions of eye contact including regulating flow of conversation, signaling attraction and expressing emotion. Body language including open and closed posture, postural echo and touch. Personal space including cultural, status and gender differences.
Explanations of non-verbal behaviour	Darwin's evolutionary theory of non-verbal communication as evolved and adaptive. Evidence that non-verbal behaviour is innate, eg in neonates and the sensory deprived. Evidence that non-verbal behaviour is learned. Yuki's study of emoticons.
