

1.5 Enzymes

- i Know the structure of enzymes as globular proteins.
- ii Understand the concepts of specificity and the induced fit hypothesis.
- iii Understand that enzymes are catalysts that reduce activation energy.
- iv Understand how temperature, pH, substrate and enzyme concentration affect the rate of enzyme activity.

CORE PRACTICAL 1: Investigate a factor affecting the initial rate of an enzyme-controlled reaction.

- v Understand how the initial rate of enzyme activity can be measured and why this is important.
- vi Understand how enzymes can be affected by competitive, non-competitive and end-product inhibition.
- vii Know that enzymes catalyse a wide range of intracellular reactions as well as extracellular ones.
