

2.10 Organic chemistry

Related topics in *Units 4* and *5* will assume knowledge of this material.

During this topic there will be the opportunity to carry out a number of internal assessment activities. Please see *Appendix 9* for more details.

Students will be assessed on their ability to:

- 1 Alcohols
 - a give examples of, and recognise, molecules that contain the alcohol functional group.
 - b demonstrate an understanding of the nomenclature and corresponding structural, displayed and skeletal formulae of alcohols, and classify them as primary, secondary or tertiary
