

Paper 3D: Decision Mathematics 1*

Topics	What students need to learn:		
	Content		Guidance
1 Algorithms and graph theory	1.1	The general ideas of algorithms and the implementation of an algorithm given by a flow chart or text.	The meaning of the order of an algorithm is expected. Students will be expected to determine the order of a given algorithm and the order of standard network problems.
	1.2	Bin packing, bubble sort and quick sort.	When using the quick sort algorithm, the pivot should be chosen as the middle item of the list.
	1.3	Use of the order of the nodes to determine whether a graph is Eulerian, semi-Eulerian or neither.	Students will be expected to be familiar with the following types of graphs: complete (including K notation), planar and isomorphic.
	1.4	The planarity algorithm for planar graphs.	Students will be expected to be familiar with the term 'Hamiltonian cycle'.
