

3.6 The emergence of a global culture, based on western ideas, consumption, and attitudes towards the physical environment, is one outcome of globalisation.	a. Cultural diffusion occurs as a result of globalisation; TNCs, global media corporations (P: role of TNCs), tourism and migration create and spread a 'westernised' global culture which impacts on both the environment and people (🌐 Changing diets in Asia). The spread of a global culture has also led to new awareness of opportunities for disadvantaged groups (🌐 Paralympic movement). (P: opportunities for these groups) (6)
	b. Cultural erosion (loss of language, traditional food, music, clothes, social relations) occurs in many locations. In some places this is the result of deliberate action (🌐 loss of Indigenous lifestyles in Papua New Guinea) and has resulted in changes to environments (de-valuing local and larger-scale ecosystems).
	c. Concern about cultural impacts, economic and environmental exploitation has led to opposition to globalisation from some groups, including governments. (A: attitudes of pro- and anti-globalisation groups, environmental movement)
