

3.9 Ethical and environmental concerns about unsustainability have led to increased localism and awareness of the impacts of a consumer society.	a. Local groups and NGOs promote local sourcing (🌐 Transition towns) as one response to globalisation by increasing sustainability (A: actions of local pressure groups); this has economic, social and environmental costs and benefits. b. Fair trade and ethical consumption schemes may reduce the environmental degradation, the inequalities of global trade and improve working conditions for some people. (A: actions of NGOs and pressure groups) c. Recycling has a role in managing resource consumption and ecological footprints, but its use varies by product and place (🌐 local authorities in the UK or local NGOs such as Keep Britain Tidy). (F: environmental consequences of different patterns of resource consumption)

Guidance for integrating geographical skills for Topic 3

The following skills provide suggested opportunities for integrating the full range of skills outlined in the geographical skills appendix (*Appendix 1*). These skills are **not** exclusive to the topic areas under which they appear; students will need to be able to apply these skills across any suitable topic area throughout their course of study.

- (1) Use of proportional flow lines showing networks of flows.
- (2) Ranking and scaling data to create indices.
- (3) Analysis of human and physical features on maps to understand lack of connectedness.
- (4) Use of population, deprivation and land-use datasets to quantify the impacts of deindustrialisation.
- (5) Use of proportional flow arrows to show global movement of migrants from source to host areas.
- (6) Analysis of global TNC and brand value datasets to quantify the influence of western brands.
- (7) Critical use of World Bank and United Nations (UN) data sets to analyse trends in human and economic development, including the use of line graphs, bar charts and trend lines.
- (8) Plotting Lorenz curves and calculating the Gini Coefficient.
