

7.6 Global concerns about the physical environment are disproportionately influenced by superpower actions.	a. Superpower resource demands (food, fossil fuels, and minerals) can cause environmental degradation and their carbon emissions contribute disproportionately to global warming. (4)
	b. There are differences in the willingness of superpowers to act (🌐 USA and China) to reduce carbon emissions and reach global agreements on environmental issues. (A: attitudes and actions of different countries)
	c. Future growth in middle-class consumption in emerging superpowers has implications for the availability and cost of key resources (rare earths, oil, staple grains and water), as well as for the physical environment.
