

Area of Study 3 – Music for Film

This area of study encompasses some of the key figures in composing for film, from Bernard Herrmann, *Psycho* and Danny Elfman, *Batman Returns* as set works to Ennio Morricone, John Williams and Debbie Wiseman in Appendix 4. The study of these works will give an understanding of how music is composed as sound to picture.

Appendix 4 provides further examples of music composed for film. These pieces give more background to the topic and provide enrichment for the study of music written for the moving image.
