

2.5 Angular motion	2.5.1 Knowledge and understanding of how angular motion is applied in a sporting context.
	2.5.2 Factors affecting moment of inertia: mass and distribution of mass from axis of rotation.
	2.5.3 Effects of increasing or decreasing the moment of inertia when rotating about an axis (whole body or specific joint).
	2.5.4 Conservation of angular momentum during flight, moment of inertia and its relationship with angular velocity.
