

4.4 Key questions	4.4.1	One key question of relevance to today's society, discussed as a contemporary issue for society rather than as an academic argument.
	4.4.2	Concepts, theories and/or research (as appropriate to the chosen key question) drawn from learning theories as used in this specification.
	Suitable examples • Is the influence of role models and celebrities something that causes anorexia? • Would it be a good idea for airline companies to offer treatment programmes for fear of flying?	

Subject content	What students need to learn:
.5 Practical investigation	4.5.1 Two observations (one observation can be carried out if both qualitative and quantitative data are gathered in the same observation).
	In conducting the practical research exercise, students must: • ensure that observations relate to an aspect of learned behaviour, such as behaviour of different sexes, driving characteristics, age-related behaviour, politeness and helping behaviour • ensure that observations enable the gathering of both qualitative and quantitative data (including the use of note taking, tallying and thematic analysis) • analyse the findings to produce results, including using a chi-squared test • consider the strengths and weaknesses of the studies and possible improvements • write up the results of the quantitative data, including appropriate graphs and tables • write up the results of the qualitative analysis (thematic analysis).
	Suitable examples • How age and sex affect driving speed. • Investigating the differences in helpful or polite behaviour in men and women.
