

8.5 Practical investigation	8.5.1 One practical research exercise to gather data relevant to topics covered in health psychology. This practical research exercise must adhere to ethical principles in both content and intention.
	In conducting the practical research exercise, students must: • conduct a questionnaire, interview or a content analysis • gather qualitative and/or quantitative data but must involve quantitative data for analysis (can turn qualitative data into quantitative data for analysis purposes) • include inferential statistical testing as appropriate such as chi squared, Mann-Whitney U, Wilcoxon or Spearman's rho • include research question/hypothesis; research method; sampling; ethical considerations; data-collection tools; data analysis; results; discussion • consider strengths and weaknesses of the practical research exercise and possible improvements.
	Suitable examples • Content analysis of pop music/television programmes e.g. references to drugs. • Content analysis of newspaper articles/news comparing references to alcohol and nicotine.
