

12.3	Evaluate probabilities for linear combinations of two or more independent normal distributions and apply this knowledge to practical situations.	
------	--	--

13 Experimental design

Subject content		Additional information
13.1	Know and discuss issues involved in experimental design: experimental error, randomisation, replication, control and experimental groups, and blind and double blind trials.	Students will be expected to explain and discuss these concepts in a given context. (applies to all of section 13)
13.2	Know the benefits of use of paired comparisons and blocking to reduce experimental error.
