

7.4 The impact of forces and stresses on each natural and manufactured timber and how they can be reinforced and stiffened	An awareness of the influence of forces and stresses that act on materials and the methods that can be employed to resist them.
	7.4.1 Forces and stresses: - a compression - b tension - c shear - d natural forces within the timber as it grows - e pre-stressed construction beams.
	7.4.2 Reinforcement/stiffening techniques: - a frame structures - b suitable fabrication/assembly/construction processes - c lamination - d use of braces and tie bars - e embedding composite materials.
