

3.7 Deciduous woodland ecosystems provide a range of goods and services, some of which are under threat	a. Examples of goods and services provided by deciduous woodland ecosystems (timber, fuel, conservation and recreation).
	b. How climate change presents a threat to the structure, function and biodiversity of the deciduous woodland ecosystem.
	c. Economic and social causes of deforestation (urbanisation and population growth, timber extraction and agricultural change). (6)
	d. Different approaches to the sustainable use and management of deciduous woodlands in a named region  .
Integrated skills: (1) Use of world maps to show the location of global biomes (2) Comparing climate graphs for different biomes (3) Interpret GIS maps (4) Use and interpretation of nutrient cycle diagrams and food webs diagrams (5) Use and interpretation of line graphs showing the range of future global population projections, and population in relation to likely available resources (6) Use of GIS to identify the pattern of forest loss.	

Assessment information

- First assessment: May/June 2018.
- The assessment is 1 hour and 45 minutes.
- The assessment consists of three sections.
- The assessment is out of 94 marks.
- The paper will assess spelling, punctuation, grammar and use of specialist terminology which will contribute 4 marks towards the overall marks for this paper.
- Each question is set in a context.
- Students must answer two from three optional questions (Coastal landscapes and processes, River landscapes and processes or Glaciated upland landscapes and processes) in Section A. Students must answer all questions from Sections B and C.
- The exam includes multiple-choice questions, short open, open response, calculations and 8-mark extended writing questions.
- Extended writing questions will assess students' ability to develop extended written arguments and to draw well-evidenced and informed conclusions about geographical questions and issues.
- Calculators will be used in the examination.

Sample assessment materials

A sample paper and mark scheme for this paper can be found in the *Pearson Edexcel Level 1/Level 2 GCSE (9–1) in Geography A* Sample Assessment Materials (SAMs) document.

Component 2: The Human Environment

Overview

This component brings together human geography and people-environment issues. The component is divided into three sections:

- Topic 4: Changing cities – this covers an overview of global urban processes and trends and detailed case studies of a major UK city and a major city in a developing or emerging country
- Topic 5: Global development – this covers an overview of the causes and consequences of uneven global development and a detailed case study of challenges that affect a developing or emerging country
- Topic 6: Resource management – this covers an overview of the global and UK distribution of food, energy and water and one detailed study of **either** energy resource management **or** water resource management at different scales.
