

4.8 Rapid growth, within the chosen developing country or emerging country city, results in a number of challenges that need to be managed	a. Challenges resulting from the chosen city's rapid urbanisation: variable quality and provision of infrastructure, services and housing; under-employment and informal employment; pollution . (7)
	b. Advantages and disadvantages of both bottom-up and top-down approaches to managing the chosen city's challenges and improving the quality of life for its people.
	c. The role of government policies in improving the quality of life (social, economic and environmental) within the chosen city.
Integrated skills: (1) Use and interpretation of line graphs and calculating of rate of change/annual or decadal percentage growth (2) Using satellite images to identify different land use zones in urban areas (3) Using a combination of population pyramids, choropleth maps and GIS (4) Using Census output area data for 2011 (5) Calculating the ecological footprint of people in the city, and comparing it to other locations (6) Using GIS/satellite images, historic images and maps to investigate spatial growth (7) Using quantitative and qualitative information to judge the scale of variations in quality of life.	

**See Appendix 2: Definitions*
