

Topic 6: Resource management

Overview of the global and UK distribution of food, energy and water	
Key idea	Detailed content
6.1 A natural resource is any feature or part of the environment that can be used to meet human needs	a. Natural resources can be defined and classified in different ways (biotic, abiotic, renewable and non-renewable).
	b. Ways in which people exploit environments in order to obtain water, food and energy (extraction of fossil fuels, fishing, farming and deforestation).
	c. How environments are changed by this exploitation (reduced biodiversity, soil erosion and reduced water and air quality).
