

2 Algebra

What students need to learn:

Ref	Content descriptor	Concepts and skills
A a	Distinguish the different roles played by letter symbols in algebra, using the correct notation	• Use notation and symbols correctly
A b	Distinguish in meaning between the words 'equation', 'formula' and 'expression'	• Write an expression • Select an expression/equation/formula from a list
A c	Manipulate algebraic expressions by collecting like terms, by multiplying a single term over a bracket, and by taking out common factors	• Manipulate algebraic expressions by collecting like terms • Multiply a single algebraic term over a bracket • Write expressions using squares and cubes • Use simple instances of index laws • Factorise algebraic expressions by taking out common factors • Write expressions to solve problems • Use algebraic manipulation to solve problems
A d	Set up and solve simple equations	• Set up simple equations • Rearrange simple equations • Solve simple equations • Solve linear equations, with integer coefficients, in which the unknown appears on either side or on both sides of the equation • Solve linear equations which include brackets, those that have negative signs occurring anywhere in the equation, and those with a negative solution • Solve linear equations in one unknown, with integer or fractional coefficients

Ref	Content descriptor	Concepts and skills
A f	Derive a formula, substitute numbers into a formula and change the subject of a formula	- Derive a simple formula, including those with squares, cubes and roots - Use formulae from mathematics and other subjects expressed initially in words and then using letters and symbols - Substitute numbers into a formula - Substitute positive and negative numbers into expressions such as $3x^2 + 4$ and $2x^3$ - Change the subject of a formula (NB: Rearranging of formulae using square roots or squares is Higher Tier only)
A g	Solve linear inequalities in one variables, and represent the solution set on a number line	- Solve simple linear inequalities in one variable, and represent the solution set on a number line - Use the correct notation to show inclusive and exclusive inequalities
A h	Use systematic trial and improvement to find approximate solutions of equations where there is no simple analytical method of solving them	Use systematic trial and improvement to find approximate solutions of equations where there is no simple analytical method of solving them
A i	Generate terms of a sequence using term-to-term and position-to-term definitions of the sequence	- Recognise sequences of odd and even numbers - Generate arithmetic sequences of numbers, squared integers and sequences derived from diagrams - Write the term-to-term definition of a sequence in words - Find a specific term in a sequence using position-to-term or term-to-term rules - Identify which terms cannot be in a sequence
A j	Use linear expressions to describe the n^{th} term of an arithmetic sequence	- Find the n^{th} term of an arithmetic sequence - Use the n^{th} term of an arithmetic sequence

Ref	Content descriptor	Concepts and skills
A k	Use the conventions for coordinates in the plane and plot points in all four quadrants, including using geometric information	• Use axes and coordinates to specify points in all four quadrants in 2-D • Identify points with given coordinates • Identify coordinates of given points (NB: Points may be in the first quadrant or all four quadrants) • Find the coordinates of points identified by geometrical information in 2-D • Find the coordinates of the midpoint of a line segment • Calculate the length of a line segment
A l	Recognise and plot equations that correspond to straight-line graphs in the coordinate plane, including finding gradients	• Draw, label and scale axes • Recognise that equations of the form $y = mx + c$ correspond to straight-line graphs in the coordinate plane • Plot and draw graphs of functions • Plot and draw graphs of straight lines of the form $y = mx + c$ • Find the gradient of a straight line from a graph
A r	Construct linear functions from real-life problems and plot their corresponding graphs	• Draw straight line graphs for real-life situations – ready reckoner graphs – conversion graphs – fuel bills – fixed charge (standing charge) and cost per unit • Draw distance-time graphs (NB: Quadratic functions from real life problems are at Higher Tier only)

Ref	Content descriptor	Concepts and skills
A s	Discuss, plot and interpret graphs (which may be non-linear) modelling real situations	• Plot a linear graph • Interpret straight-line graphs for real-life situations – ready reckoner graphs – conversion graphs – fuel bills – fixed charge (standing charge) and cost per unit • Interpret distance-time graphs • Interpret information presented in a range of linear and non-linear graphs
A t	Generate points and plot graphs of simple quadratic functions, and use these to find approximate solutions	• Generate points and plot graphs of simple quadratic functions, then more general quadratic functions • Find approximate solutions of a quadratic equation from the graph of the corresponding quadratic function
