

- 1.10 Recall that waves are reflected and refracted at boundaries between different materials
- 1.11 **Explain how waves will be refracted at a boundary in terms of the change of speed and direction**
- 1.12 Describe that waves transfer energy and information without transferring matter
- 1.13 Use the terms of frequency, wavelength, amplitude and speed to describe waves

- 1.14 Differentiate between longitudinal and transverse waves by referring to sound, electromagnetic and seismic waves
